031600ATP – A Finkl & Sons

Pollutant	Type	2005 Emissions (tons/year)	2006 Emissions (tons/year)	2007 Emissions (tons/year)
Chromium	TRI	0.224	0.126	
Lead	TRI	0.242	0.198	
Manganese	TRI	1.627	0.756	
Nickel	TRI	0.034	0.02	

- The source is a Title V source
- The source has a granted construction permit for a new location at 1355 E 93rd St, Chicago, IL 60619. From what we understand, all operations currently at this location will move to the new location.
 - ⇒ *The source has submitted compliance notification required under Area Source Electric Arc Furnace Steelmaking Facilities NESHAP. There is no standard for EAF facilities that are major for HAP. However, the area source NESHAP is MACT – that is, the same level of control that would have been required of major sources of HAP. The MACT standard requirements are the same as the voluntary National Vehicle Mercury Switch Recovery Program requirements.*
